## EXHIBIT 4.0 MAINTENANCE AND WARRANTY

### AVAYA CERTIFIED

Will County Government is currently covered under Avaya Direct maintenance. **SSU.**

The selected vendor must be able to certify the proposed and installed components/programming are in compliance with Avaya standards. **Failure to meet the requirements of the bid or to successfully complete the installation will be grounds for termination of the contract and forfeiture of payment.**

Please provide copies of documentation and/or certification from AVAYA that shows that your organization is an AVAYA ECG Certified Business Partner. Vendors who are not able to provide this formal verification will not be considered.

If your proposal includes the use of an AVAYA Certified Business Partner as a subcontractor to fulfill the requirements of this Request, please provide certifications and all company background information, subcontracting arrangements and your relationship to the proposed subcontractor. In this environment, the County will require that any subcontractor provide detailed company background and information similar to that information requested of the proposing vendor. The County shall hold both the proposing vendor and any subcontractor responsible for the performance of the system and the certification of the equipment and software installed.

The County reserves the right to accept or reject any vendor proposals who's subcontracting agreement or arrangements are not deemed appropriate or would (in the County's opinion) constitute undo risk to the County.

The selected vendor is to warrant all equipment and materials associated with this installation.

**Upon Official AVAYA certification** and "final registration" of the enterprise upgrades, components and programming by the selected vendor, maintenance will be resumed by the County's current contracted maintenance provider (Avaya).

Note: A person who makes a false certificate commits a Class 3 Felony.

Sections 33E-3 and 33E-4 provide as follows:

**33E-3. Bid-rigging.** A person commits the offense of bid-rigging when he knowingly agrees with any person who is, or but for such agreement would be, a competitor of such person concerning any bid submitted or not submitted by such person or another to a unit of State or local government when with the intent that the bid submitted or not submitted will result in the award of a contract to such person or another and he either (1) provides such person or receives from another information concerning the price or other material term or terms of the bid which would otherwise not be disclosed to a competitor in an independent non-collusive submission of bids or (2) submits a bid that is of such a price or other material term or terms that he does not intend the bid to be accepted.

Bid-rigging is a Class 3 felony. Any person convicted of this offense or any similar offense of any state or the United States which contains the same elements as this offense shall be barred for 5 years from the date of conviction from contracting with any unit of State or local government. **33E-4 Bid rotating.** A person commits the offense of bid rotating when, pursuant to any collusive scheme or agreement with another, he engages in a pattern over time (which, for the purposes of this Section, shall include at least 3 contract bids within a period of 10 years, the most recent of which occurs after the effective date of this amendatory Act of 1988) of submitting sealed bids to units of State or local government with the intent that the award of such bids rotates, or is distributed among, persons or business entities which submit bids on a substantial number of the same contracts. Bid rotating is a Class 2 felony. Any person convicted of this offense or any similar offense of any state or the United States which contains the same elements as this offense shall be permanently barred from contracting with any unit of State or local government.
